Subject: RE: [REDACTED] Brockton District Court case

Hey Sonja,

Thanks. I have a summons for this case but no Lab #'s. I will pull all the data for this case and email it to you next week.

As for the Lisdexamphetmaine, Marquis gave me a faint brown color on the exterior of the spot plate well after 10 mins. I would call that negative. Stacey had submitted a sample to MS to be confirmed because she assumed it was an amphetamine. She did a base conversion, but the MS looked like a blank. I remember doing an IR the first time I encountered this drug just for curiosity sake but I had to do a steric acid cleanup. The IR was poor quality, so never documented it in my notes per Chuck. I will try to retrieve the IR (if we still have it) from IR back up data.

Sorry . . I will see what other info I have on the lisdexamphetamine.

Hi Annie-

You are probably aware of this case already, but in case you weren't I thought I'd pass it along to you (you are the 1st chemist for these numbers, as well as for [REDACTED]). When you have a chance (no rush since the trial isn't until May), would it be possible for you to email me the files for the MS data? Thanks.

Also, Peter mentioned that you have tested for lisdexamphetamine in the past. I believe he said that it is an "E", but if you have a mass spectra or IR of it, would you mind getting a copy to me? I'm having some trouble getting it (I wasn't aware it was an "E" ahead of time), and I'm a little bit worried as the MS gave me a peak much later than I thought with a huge 84 peak. Thanks again.

-Sonja

Subject: [REDACTED] Brockton District Court case
Hi,

I was recently assigned the [REDACTED] drug case in the Brockton District Court. It's a 2004 case which was granted a new trial based on Melendez-Diaz. You performed analysis on the drugs back in 2004 [REDACTED]. Could you please send me a copy of your resume so that I can provide it to defense counsel? The case was recently marked for trial on 5/16/11.

Thanks,

Tim Kenny
